

THE WORLD OVER

MANUFACTURING PRODUCES
MORE THAN AGRICULTURE?

The Canadian Press estimates Canada's national income from all sources for 1932 at \$4,445,000,000, which was \$452,000,000 greater than in 1931. In making up the table the Canadian Press used the figures of the Dominion Bureau of Statistics.

Manufacturers produced the greatest wealth with agriculture second, mining third, tourist traffic fourth and forestry fifth. Manufactures was valued at \$1,407,673,000 and agriculture at \$744,989,000. Mining production was valued at \$375,000,000 and tourist traffic at \$250,000,000.

One very important point should not be overlooked in considering the values of agriculture and manufactures, and that is that the valuation of manufactured production is based on an artificially high domestic price while the bulk of agricultural production is valued on the comparatively low level of world prices.

ITALY TO KEEP OUT OF SPAIN

LONDON—Britain asked and won an Italian guarantee to keep "hands off" Spanish territory before signing the Anglo-Italian Mediterranean Treaty, publication of the treaty notes between the two governments revealed Sunday.

The Mediterranean agreement, whereby Britain and Italy agreed to forget controversy over sanctions in the Ethiopian campaign, was signed in Rome Saturday.

Two days before, Italian Foreign Minister Galeazzo Ciano assured London in answer to a British note: "So far as Italy is concerned the integrity of the present territories of Spain shall in all circumstances remain intact and unmodified."

HON. C.C. ROSS RESIGNS

FROM PROVINCIAL CABINET

Resignation of Hon. C.C. Ross, Minister of Lands and Mines in the provincial cabinet, was announced last on Tuesday by Premier Aberhart and at the same time Nathan E. Tanner, speaker of the legislature and member for Cardston, was sworn in as Mr. Ross' successor by Sir Lordship Chief Justice Horace Harvey, as administrator of the province.

Mr. Tanner will have over his duties as Minister of Lands and Mines.

ABERHART GOVERNMENT

TO CURB DEBTS EVADERS

Premier Albert Aberhart told Alberta Sunday, irrespective of important decisions he must make regarding his cabinet, his government will follow sane, fair policies in its determination to create a province in which people may "live on their own."

He emphasized this applied to the all development industry. Settle estate records circulated before his brief vacation at Vancouver, he said no drastic legislation would be introduced. The only drastic laws he would be tempted to consider would be measures to curb evaders who take unfair advantage of debt legislation, although they were able to pay.

CARBON'S SILVER JUBILEE TAKES PLACE ON JULY 2ND

On July 2 of this year Carbon will have completed 25 years as a village in the province of Alberta.

The first election of officers was held on the above date and the first Village Council meeting was held on July 15, with A.J. McLeod, chairman and T.J. Bishop and W. Poxon councillors.

Should Hold Celebration

In commemoration of the silver jubilee of Carbon it would be most fitting if the citizens could get together and devise some celebration to mark the event. The Carbon Stampede date has been set. Possibly a celebration could take place on this date. While it is still early in the year, it must be realized that a silver jubilee celebration should be well planned if it is to remain long in the memory of the citizens.

JOLLY SKATING PARTY HELD BY Y.P.S. CLAN

Members of the United Church Y.P.S. Club, of the A.Y.P.A. members at a skating party at the local rink on Tuesday night and despite the cold weather everyone had an enjoyable time. Following the skating the club returned to the I.O.D.E. Club rooms where a nourishing lunch and refreshments, coffee and cake was served.

Several contests were conducted, and a few sets of table tennis were played.

As president of the A.Y.P.A., Mr. Charles Smith thanked the Y.P.S. for their hospitality.

Dancing was started and continued until after midnight, when the party broke up.

MORE LICENSES SOLD IN 1936

EDMONTON—Automobile licenses issued in Alberta during 1936 totalled 96,496 according to figures released on Monday. This is an increase over the total for 1935 when 92,870 were issued.

Pleasure car licenses in 1936 totalled 79,135 and truck car licenses totalled 17,361.

Official reports that a heavy demand has been received for the new stickers which motorists will have to obtain if they desire to operate their cars from now until April 1, when the new licenses are issued. At present the province is changing over from its calendar year to fiscal year, which begins April 1. In this period, motorists are to use stickers. These must be obtained not later than January 14.

"HOME JAMES!"

If you are about to leave a party, and you notice that the room is weaving and bobbing, make your way as best as you can to the nearest phone and tell central, "I'm at such-and-such an address, and I don't want to drive home." In a short time, a taxi will arrive with two drivers. One will take you home; the other will take your car home.

That's a service now offered by taxi cab companies in certain United States cities. And it is hoped that it will be inaugurated generally throughout the country.

It is made available to and used by persons who drink not wisely, but too well, it may help to avert the terrible drunken driver menace that helps build the nation's casualty toll—Calgary Alberta.

LETTERS TO THE EDITOR

Editor, The Carbon Chronicle.

Dear Sir—
In referring to the letter in your issue of the 24th inst. Re, seed and feed for the farmers, I would say that I am very sorry for the people but I am afraid that they are appealing to the wrong organization to expect much help, that is if the Group Number is anything like some others. At one group meeting recently there were just seven in attendance all day, so you see they are slowly dying.

Any how the letter referred to, seems to have brought a statement from our Mr. Foster M.C.A., and in last week's issue of your paper there is an item as follows, "Foster gives assurance of seed grain and feed," but what you really read is that he found that it is only another Social Credit myth. He, Foster, gives no assurance of the above, but only, "that he would bring the matter up at the next session of parliament in the effort" to have the needs of the constituency cared for. Anyone can see by reading the article how very misleading the heading is, to those who had heard that it was only a question of their usual line of bunk. Mr. Foster knows that there is no money, yet at the disposal of government to purchase grain or feed, and some of our Cabinet Ministers and the Premier have been to Ottawa so often to get some real feed for the poor men, that the people of this province have lost faith in Aberhart's (fountain pen) Credit theory. Don't you know, Mr. Teutonic, that if the Federal Government had not come to the aid of Alberta, and lent us \$500,000, our Social Credit government could not have paid any relief money for December? Thanks to Mr. Dunning they are able to survive a little longer. Instead of their "holes in the bottom of the treasury," as stated by Mr. Aberhart when he took office, now he has a credit, and he is not at all sure that he will be able to keep it. Now, Mr. Teutonic, I would suggest that you forget you were ever an Aberhart Social Credit—there are quite a number who have, you know—and call a mass meeting of the electors of the Carbon district, and have Mr. Foster appear at this meeting, but for heaven's sake don't have a bigoted chairman. I warn you that if you make it a S.C. meeting it will receive a very poor reception. We anti-Aberharts have not forgotten your meetings held prior to the election, and naturally after the election and courtesy shown at those, we are not anxious to take part in any called under the Social Credit auspices.

In a future article I wish to write on the foolish attitude of the present Alberta Government in their attempt to remedy the ills of our present economic system. Their method reminds me of the quacks of my boy-hood days who cured everything by human hot air and balloons.

I would refer the readers of this letter to the warnings and the points in Aberhart's theory, that were contained in letters written to this paper before the election, and now compare with the fallacies and foolishness expounded by the agitation of Social Credit at that time.

Yours sincerely,
THOMAS J. KING.

"Where is the manager's office?"
"Follow the passage until you come to the sign reading 'No admittance'." Go upstairs till you come to the sign "Keep out." Follow the corridor to the sign "Silence," then yell for him."

"I would refer the readers of this letter to the warnings and the points in Aberhart's theory, that were contained in letters written to this paper before the election, and now compare with the fallacies and foolishness expounded by the agitation of Social Credit at that time."

Yours sincerely,
THOMAS J. KING.

PARLIAMENT TO MEET FOR QUICK SESSION BEFORE THE CROWNING OF GEORGE 6

Premier King Hopes For Prorogation Before May First

Parliament will assemble January 14 for what is hoped will be a quick session, ending the last of April so that members of the government and of both Houses may attend the coronation ceremonies in London on May 12. Prime Minister Mackenzie King upon announcing the opening date, said he could see no reason why the work of Parliament could not be completed in three and a half months.

"If we are unable to prorogue before the coronation we will have to adjourn and come back for a midsummer session," the Prime Minister said.

Immediately after the coronation there will be an Imperial Conference which will take up the greater part of June if not longer.

Everything will be in readiness for rapid despatch of business, so far as the government is concerned, the Prime Minister said. According to the rules of Parliament a large part of the first month of each session is given over to private members. It is possible that this privilege may be curtailed or suspended on this occasion; but only on general agreement of all members.

THE WORLD OF WHEAT

H.G.I. Strange

A Scotchman made perhaps the greatest gift ever sent to Canada and received nothing in return.

This refers to the introduction into Canada and the west of the famous Red Fife wheat, which was not only of superlative quality itself, but also the parent of the Marquis, Red Fife, Gazelle, Thatcher, and other good varieties.

It appears that in 1842 David Fife of the township of Glenora, Canada West, (now Ontario) asked a friend in Glasgow, Scotland, to send him a little wheat. This Scottish farmer took a small quantity from a cargo ship that had just arrived from Danzig. David Fife received this seed and it only three years later, these were carefully preserved and seeded again and proved to be a wonderful wheat which was soon given the name of Red Fife.

Red Fife was imported into Manitoba about 1870, and the first shipment of wheat from Western Canada made in 1876, consisted entirely of Red Fife. This established the high reputation of Canadian wheat on the world market.

David Fife made little or nothing out of his selection, and the name of his Scottish friend who made the valuable gift to us is not even known.

Following factors have tended to raise prices:
Persistent wet weather in the south, eastern hemisphere lowers the quality and quantity and delays the movement of new wheat.

Snow covering in Russia insufficient and good precipitation needed.

Italian wheat production for 1936 compared as 277 million bushels as compared with 284 million bushels in 1935.

Continued unsettled European conditions.

Following factors have tended to lower prices:
Large U.S. wheat acreage indicated with production slightly over 600 million—Italian crop, rice and oats considerably larger in 1936 than in 1935—U.S. Department of Agriculture reports ample world wheat supplies during present crop year—Reports of considerable surplus of Turkish wheat barley and corn for export this year.

HIGHWAY MAY BE BUILT TO GREAT SLAVE LAKE

EDMONTON—Construction of a highway to be built from Grimshaw, in the Peace River territory, to Great Slave Lake was discussed at a meeting on Tuesday between Hon. W. F. Shaw, Minister of Public Works and

PERRY JOHNSON IS NEW MANAGER OF HARDWARE

Perry Johnson, who has been employed at the Builders' Hardware Store in Carbon for the past six years has taken over the management of the store commencing January 1st.

Mr. Johnson is the son of Mr. and Mrs. Thos. G. Johnson of Carbon and was educated at the Carbon public and high schools. He is well known to the people of the town and district and we wish him every success in his new position.

LONG YEARS AGO

January 5, 1922

Messrs. W. Hay and Jim Hay who are both ill with pneumonia, are now improving nicely.
Quite a number of old-timers were the guests of Mr. Ramsey Nash, of Carbon, on Wednesday evening, reported having a good time.
L.B. Hirst of Carbon was elected Publicity Secretary of the Huxley to Granger district U.P.A. Association at their annual meeting in Three Hills on Wednesday.

At Carbon, on Wednesday evening, reported having a good time.
L.B. Hirst of Carbon was elected Publicity Secretary of the Huxley to Granger district U.P.A. Association at their annual meeting in Three Hills on Wednesday.

L. Poxon, 11; C. Burnett, 10; W. Lott, 9; Fred Poxon, 13; F. Morrison, 8; C. Nash, 8; T. Benson, 7; J. Muir, 5; J. McLean, 6; G. Malton, 10.

TESTED RECIPES

Veal Cutlets en Casserole

Use slices of veal from leg cut one half-inch thick. Wipe with damp cloth, remove bones and skin, then cut in slices for serving.

Sprinkle with salt and pepper. Dip in cracker crumbs, beaten egg and cracker crumbs again. Soak in hot fat until a golden brown. Place in casserole and add enough milk or water to cover the bottom of the casserole.

Stuffed Pork Chops

2 cups stale bread
One-half teaspoon salt
One-quarter teaspoon pepper
1 tablespoon butter
2 teaspoons finely chopped sage
1 teaspoon finely chopped onion
Water to moisten

In breading chops, have the butcher cut two chops in one piece and ask him to make a pocket in the center of each piece for the stuffing. Use the above ingredients to stuff the pockets.

Melt butter in a frying pan, add crumbs and seasoning, mix all together thoroughly, stirring until crumbs are slightly browned, and moisten with water. Salt and pepper chops and stuff. Then place in open pan.

Tony Mee, well-known northerner.

The proposed road which would be more in the nature of a winter road would be about 300 miles long, the distance being 200 miles from Grimshaw to the Alberta border and 110 miles from the border to Great Slave Lake, in the North West Territories.

A permit will be required to build in the territory. The purpose of the highway would be to open up the Athabasca River valley, which is fertile and productive both as to grain and furs. This year about 1,000,000 bushels of wheat were drawn from the area by some 20 trucks and the road would greatly facilitate the transportation to and from the area.

Mr. Fallow said he would discuss the prospects of the road with Dominion officials at a convenient time.

LOCAL HOCKEY SCHEDULE GAMES NOW BEING PLAYED AT CARBON SKATING RINK

Games between the four teams in the local hockey league are now being played with Maroons winning two, and Maple Leafs winning one. With the schedule just getting nicely started some interesting games are promised within the next month.

The following is the schedule of games now being followed:
Jan. 6—Maroons at Americans.
Jan. 8—Canadians at Americans.
Jan. 11—Maple Leafs at Maroons.
Jan. 13—Americans at Maple Leafs.
Jan. 15—Canadians at Maroons.
Jan. 18—Maple Leafs at Canadians.
Jan. 20—Maroons at Americans.
Jan. 22—Canadians at Americans.
Jan. 25—Maple Leafs at Maroons.
Jan. 27—Americans at Maple Leafs.
Jan. 29—Canadians at Maroons.
Feb. 1—Maple Leafs at Canadians.
Feb. 3—Maple Leafs at Maroons.
Feb. 5—Canadians at Americans.

OBITUARY

William Milligan, 68 years of age, son of William and Sarah, died at his home at 302 Third Avenue North, in Calgary on Thursday, December 31st. Born in Glasgow, Scotland, he came to Canada 26 years ago.

Surviving are his wife, Sarah; a son, William, in Carbon; three daughters, Mrs. A. Higgins, Calgary; Mrs. H.R. Brown, Carbon, and Miss Agnes Milligan, in Calgary.

Funeral services for the late William Milligan were conducted on Monday, January 4th, at Park Memorial Chapel, Rev. Wm. McKillop, former minister of Carbon United Church, officiated.

Interment was in Burnside cemetery, with Armstrong funeral home in charge of arrangements.

Wilfred Foss, returned to Edmonton on Sunday to continue his studies at the University of Alberta.

Ruth Ramsey arrived from Edmonton on Saturday morning and spent a few days visiting with her mother here. We understand that Ruth is leaving for California to nurse in one of the hospitals.

At a local hospital on New Year's day the "Foreigners" won from the "Natives."

Frank Sherry, who has been spending the past week visiting in Carbon with his family, returned to his position on the C.P.R. station at Strathgairn today.

Millions of "Little Savings" Make Up Life Insurance

LIFE INSURANCE ASSETS—large in the aggregate—actually consist of the "little savings" of more than 3,500,000 Canadian policyholders. The great majority of these policyholders are men and women of moderate means, whose thrift often involves personal sacrifice.

Sharing in the protection and financial security of Life Insurance, are people from every walk in life—including thousands upon thousands of wage earners whose individual savings are necessarily small. That is why Life Insurance is rightly regarded as Canada's greatest co-operative enterprise.

Consider what your savings in Life Insurance mean to you and your dependants, in protection and peace-of-mind. Then you can realize what millions of similar savings mean to the people of Canada.

These combined savings in Life Insurance, which total more than Two Billion Dollars, are invested so that every obligation to policyholders and beneficiaries may be promptly and fully met.

Day after day, year after year, "little savings" in Life Insurance accomplish great things in aiding the widows and fatherless—in educating children—in making older men and women financially independent.

Life Insurance

WHEAT PRICE STABILIZATION SHOULD HAVE COST NOTHING

Those "far-sighted" interests and people who have been so industriously advocating over the past few years the cleaning up of the Canadian wheat surplus stocks of wheat do not now seem to be so proud of their action for little is being heard from them. In the meantime their "calamity howling" brought about what they desired;

the Canadian surplus wheat stocks may have been cleaned up including, of course, the grain delivered to the Federal Wheat Board from the 1935 crop.

Upon the basis of all the ancient arguments about average prices advanced by the grain trade, particularly during the food years a substantial sum of money should be coming to those farmers who delivered their wheat to the Board last year. But any

information on this subject will hardly be forthcoming until parliament meets. It is plain, however, that of the huge pile of wheat the Board inherited from the McFarlane regime but a fraction now remains in its hands.

Even at that the wheat price stabilization experiment should not cost Canada a dollar. Those who complain of the tremendous cost to the taxpayers of the country of price stabilization policies should be much relieved at this. It may be that the Dominion will actually make a tidy little sum on its adventure in grain and it seems now apparent a real killing could have been made and the farmers of the west given a great deal of assistance through a less aggressive policy.

The Winnipeg Free Press possibly the most outspoken critic of the stabilization process, takes a great deal of credit for the clearing out of Canadian excess supplies. It says:

"The speed up in Canadian exports has been in no sense a fire sale and has not depressed the market. On the contrary, the price is at its highest level since the depression began. Farmers of the west can look at the present position with satisfaction and hope. Whatever crop they harvest next year it will not have to compete with previous crops of their own growing. Disappearance of the excess carryover by next summer is a practical certainty. The 1937 crop will have a free field and the prospect is, if the present wide selling is continued, that it will find a ready sale at a satisfactory price."

The Free Press carefully evades the fact that the greater proportion of this year's wheat crop was marketed by the farmers before the price rise developed in earnest. The wheat were prevented from participating in the increase because they were prohibited from using the Federal Wheat Board, and further, that the McFarlane policy has been definitely proven by actual currents of events to be right. So far as prices for the Free Press or no one else can predict what they will be.—The Budget.

PRINTERS' PARLANCE

"Slug," "Kill," "Devil," "Hel box," and so on. If you hear a couple of chaps talking dispassionately and using these and kindred terms, do not be alarmed. They are printers and are using the jargon of the trade.

A "Stick" is not a club, nor is a "Galley" a bar or a cooking place. None but those used to the composing room conversation can make sense of Swashbuckling Language.

Type is the voice of the Fourth Estate.

Journalists may discover the facts, draw conclusions, write upon the doings of the day, but—rattle their type writers how they may, says Henry Edison Williams in The Christian Science Monitor, their message is muted until type comes to the rescue.

And a swashbuckling language it is, too. When printers turn to discussing their craft, writers of detective thrillers might well cower to it. It is great edification while overhearing these dear fellows, Holmes and Watson, surely would expect to ring for the patrol wagon.

For readers who can stand the jolt, here is a sample only to be read with the understanding that what seems highly combustible material is actually representative of an authentic and respectable terminology known as printing house parlance.

"Well, the comp tossed a handful of pl into the hellex, and, holding to the devil, he said: 'Look about lad, for the dagger that dropped out of the form. I'm going to kill a fat head and use a lean type for the dummy.'"

Wait a moment! The situation is well in hand. In fact, you have listened to a completely prosaic conversation.

The first speaker is saying that the compositor (comp), or typesetter, threw some jumbled up and useless type (pl) into a receptacle provided just for that purpose (hellex) and turning to the apprentice boy (devil), instructed him to look for a reference mark (dagger) which dropped out of the page of type (form). He further informs his auditor that he is going to discard (kill) a heading of thick type and few letters (fat head) for one of thin type containing more letters, which he will incorporate in a sample page of set-up (dummy).

There is "ad copy," "news copy," "ed" (or editorial) copy and so on in the printing department, but in the editorial department, no such distinction is made. Everything is a "story." A story over the editorial desk may be an editorial, an essay, a special article a woman's page column, a report of a league meeting, a critique of a play.

A newspaperman is a newspaperman, but a journalist is merely a newspaperman out of a job. While a member of the Women's Press Club or the Author's Association of well-just that.

But this sort of thing might go on ad infinitum. The moral from it all may be: Never judge a printer by the language he uses. He may be talking most innocent trade twaddle.

THRILLING! SENSATIONAL!

CANADIANS AND THEIR INDUSTRIES...AND THEIR BANK.

MINING AND METALLURGY

Mining in Canada, now second largest of the country's industries, gives employment to 80,000 workmen and has a production value of over \$100,000,000 per annum.

As an accompaniment of this great and growing mining industry, Canada is building up a smelting and refining industry of world importance. There are now huge plants in Ontario, Quebec, Nova Scotia, British Columbia and Manitoba. These plants produce:

Copper • Nickel • Zinc • Lead • Cadmium • Iron
Emulsion • Gold • Silver • Boron • Radium
Calcium • Selenium • Aluminum • Tellurium • Uranium

The plants give direct employment to 10,000 workers, and indirect employment to many thousands more; have a production value of \$200,000,000 per annum; purchase coal and electricity to the value of \$12,000,000; pay for

equipment, supplies, freight, etc., some \$10,000,000 per annum; and add some \$100,000,000 to the export value of Canada's mineral products, without counting the value of the gold recovered from base metal ores.

Prominently identified with the upbuilding of the smelting and refining industry of Canada from its inception, the Bank of Montreal gives this industry financial service through every stage. Thousands of workers are depositors, sharing in the safety and facilities of the Bank with their employing companies.

The Bank's services include: Commercial accounts; foreign currency accounts; financing of shipments; loans and discounts; collections; trade and credit information; safekeeping of securities; savings accounts; money orders; travellers cheques; banking by mail; personal loans.

Snicklefritz....

A merchant sent home to his wife a very clever parrot. It arrived just before he himself was due and on the same day his wife had gone out, ordered a chicken, and told the cook, "There is a bird coming for tonight's dinner. Cook it!"

The parrot arrived first, and was cooked. Then the husband arrived. "What's this?" he asked at dinner. The parrot explained the cook's mistake.

"This is awful," said the merchant, "why, the bird could speak eleven languages."

"Then why didn't it say something?" asked his wife.

Mother had just given Marjorie and Bobbie each a helping of dessert with meringue on top. Marjorie looked at Bobbie's dish and then said:

"Well, mother, you put more suds on Bobbie's pudding than you did on mine."

Maid: "What saucer do we have with 'amb chop'?"

Mistress: "I have told you before that you must work out your crossword puzzles alone."

First Burglar: "If I can pick this lock we can lay our hands on \$50,000."

Second Burglar: "Is that so? Well, go easy on my pickaxe!"

One of the clerks at the employment agency was a bit of a wit, and he was preparing to gain a laugh at the expense of the next in line.

"Where were you born?" he asked the man, a Scotchman.

"Glasgow," was the reply.

"Glasgow! Whatever for?" continued the funny one.

"To be near mother," said the other with devastating sweetness.

Duke Visitor: "Is it really healthy out here?"

Ranchman: "Healthy, did you say? Why, they had to shoot a couple of fellows to start a cemetery."

Trainer (encouragingly): "What you've got to do is to stick it and go for 'im, and you'll come through with flying colors."

Doubtful Boxer: "Yes! At half-mast."

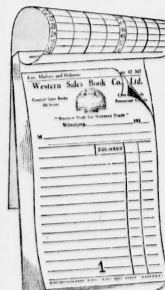

Guide in Egypt: "It took hundreds of years to build those pyramids."

Tourist: "Oh, I see! It was a government job, then."

"Somebody
to see you!"

IF EVERYBODY with something to interest you should come and ring your bell, what a nuisance it would be. Think of the swarming, jostling crowd, the stamping of feet on your porch and carpet!

Every week we know of many callers who come to see you. They never jangle the bell—they don't take up your whole day trying to get your attention. Instead, they do it in a way that is most considerate of your privacy and your convenience. They advertise in your newspaper!

In this way you have only to listen to those you know at a glance have something that interests you. They make it short, too, so you can gather quickly just what you want to know. You can receive and hear them all without noise or confusion in a very few minutes.

In fairness to yourself look over all the advertisements. The smallest and the largest—you never can be sure which one will tell something you really want to know.
